

M A T A N K A L I F A

Software Engineer | Full Stack Developer

SUMMARY

Driven Software Engineer with 4 years of hands-on experience in full-cycle software development. Specialized in architecting complex, scalable systems with a strong emphasis on Clean Architecture and performance optimization. Expertise in modern full-stack environments, delivering high-quality, maintainable code for challenging, user-centric applications.

PROFESSIONAL EXPERIENCE

- **Full Stack Developer | Electis** 2025 - Present
 - Leading end-to-end development of high-load enterprise systems, ensuring seamless integration between backend logic and interactive frontends.
 - Architecting server-side solutions with Node.js and TypeScript, utilizing Redis for distributed caching and BullMQ for asynchronous job processing.
 - Consistently applying Clean Architecture principles to decouple business logic from external frameworks, enhancing system stability and testability.
 - Developing sophisticated, responsive user interfaces with React, focusing on efficient state management and reusable components.
- **Freelance Full Stack Developer | Independent Consultant** 2024 - Present
 - Built a Telegram bot that uses AI to analyze business receipts and insert the extracted data into a third-party application.
 - Created the [GMK website](#), a corporate website with full version management and complete content-control capabilities.
- **Full Stack Developer | TinDog App** 2020 | 2025 - Present
 - Developed and maintain a production-grade mobile application available on app stores, supporting a community of over 5,000 active users.
 - Executed a comprehensive system refactor and redesign to modernize the architecture, improving application responsiveness and maintainability.
 - Engineered a high-performance backend using Node.js and Redis, incorporating advanced queue management to handle concurrent user traffic.
 - Strictly implemented Clean Architecture methodologies, ensuring a framework-agnostic core and robust data layer separation.

EDUCATION

- B.Sc. Software Engineering | Sami Shamoon College of Engineering (SCE) 2021 - 2025
- Degree completed with a focus on core engineering principles, distributed systems, and advanced software design.
- Government-Accredited Certification in Android Development.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Node.js, React, Dart, Flutter, Express.

Architecture: Clean Architecture, SOLID Principles, Strategy Pattern, MVC, Object-Oriented Programming (OOP).

Infrastructure & Tools: Redis, BullMQ, MongoDB, SQL, Firebase, Git, Riverpod, Bloc, Context API.
